HERBIONIX LLP

H-Reflux™ Formulation Overview

Research-driven Ayurvedic pharmaceutical development

This table summarizes the formulation architecture of H-Reflux™ with concise scientific roles, traditional logic, and quality markers. Information relates to the ingredients and formulation design; product-specific clinical effects will be established through Herbionix's planned development program.

Ingredient	Standardization	Qty / Tablet	Primary Scientific Role	Key Bioactive Components / Quality Markers
■ **Shankh Bhasma**	Classical Mineral Preparation	220 mg	Acid Neutralization & Mineral Antacid	Calcium carbonate; calcium assay; pharmacopoeial quality checks
■■ **Laghu Sutshekhar Ras (AFI)**	Classical Polyherbo-Mineral Formula	100 mg	Pitta Balance & Digestive Support	Shuddha Gairika, Shunthi, Nagavalli Bhavana; AFI-based preparation
■ **Yashtimadhu Extract**	Standardized Botanical Extract	80 mg	Gastric Mucosal Support	Glycyrrhizin, liquiritigenin, glabridin; extract marker specification
■ **Guduchi Extract**	Standardized Botanical Extract	60 mg	Digestive Support & Rasayana	Tinospora phytochemicals; tinosporide, cordifolioside, polysaccharides
■ **Amla Extract**	Standardized Botanical Extract	45 mg	Antioxidant & Cooling Support	Emblicanins, gallic acid, ellagic acid; total polyphenols/tannins
■ **Haritaki Extract**	Standardized Botanical Extract	40 mg	Digestive Support & Mild Laxative	Chebulagic acid, chebulinic acid; tannin/polyphenol profile
■ **Shatavari Extract**	Standardized Botanical Extract	35 mg	Cooling & Gastric Mucosal Support	Shatavarins, steroidal saponins; saponin standardization

Formulation Design Logic

The formulation combines a mineral acid-neutralizing component, a classical AFI digestivesupport formulation, and four standardized botanical extracts. The overall design is intended to align with Ayurvedic principles while using modern quality controls for identity, consistency, and batch reproducibility.

Why each ingredient is included

Ingredient	Why it is in H-Reflux™
Shankh Bhasma	Mineral antacid foundation for acid neutralization rationale
Laghu Sutshekhar Ras	Classical Pitta-balancing Ayurvedic base formulation
Yashtimadhu	Supports gastric mucosal health and soothing action
Guduchi	Supports digestive balance and Rasayana philosophy
Amla	Adds antioxidant and cooling support
Haritaki	Supports digestion and natural bowel regulation (Anulomana)
Shatavari	Adds cooling and gastric mucosal support

Scientific Note

Scientific information in this overview relates to the individual ingredients and their documented traditional or experimental rationale. It should not be interpreted as established clinical efficacy of the finished H-Reflux™ formulation until product-specific clinical evidence is generated and reviewed.
